Rapportnummer:	2409-N-10839
Datum van aankomst:	17.09.2024
Datum van het rapport:	23.09.2024
Testen begonnen:	17.09.2024
Testen voltooid:	23.09.2024
Status van het rapport:	Eindrapport

Diersoort:	Hond
Ras:	Grote Poedel
Geslacht:	vrouwelijk
Naam:	Rapsody of Didi's Dream
Stamboeknummer:	NHSB 3313455
Chipnummer:	528140000917577
Geboortedatum / Leeftijd:	23.07.23
Type monster:	Swabs
Eigenaar / Dier-ID:	Thijzen, G.S.
IT No. / Report-ID:	---

Progressive Retinal Atrophy (rcd4 PRA) - PCR

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for rcd4-PRA in the C2orf71-gene.

Trait of inheritance: autosomal-recessive

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Australian Cattle dog, English Setter, Gordon Setter, Irish Setter, Irish Red&White Setter, Old Danish Pointing Dog, Polish Lowland Sheepdog, Polish Tatra Sheepdog, Poodle, Small Munsterlander, Tibetan Terrier

Notice: It is assumed that other, until now unknown, mutations exist as app. 10% of ill Irish and Gordon Setters and 80% of ill Tibet Terriers do not carry this mutation.

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2018. (except partner lab tests).
